

TABLE OF CONTENTS

Introduction	7
Climate Change for Kids: in Four Parts	8
Part 1: The Greenhouse Effect	9
First Things First: Air	9
How Many Molecules Are in a Box of Air	11
Air Is a Mixture of Different Kinds of Gas Molecules	14
How Small Amounts Can Have a Big Effect	15
Molecules Can Absorb the Sun's Energy	17
Absorbing the Sun's Energy	18
Greenhouse Gases	19
How Many Molecules Are in a Box of Air, Continued.....	20
Vibrating Molecules Heat Things Up: The Greenhouse Effect	21
Part 2: Global Warming	25
Too Much of a Good Thing: Global Warming	25
Machine-Made or Not	26
Making Energy: The Combustion Reaction	27
In the Name of Science: An Activity Where You Generate Greenhouse Gases	28
Time for Some Math: How Many More?	29
How Do Scientists Know the Concentration of Greenhouse Gases in the Air?	30
Graph the Concentrations of Greenhouse Gases	31
Feedback Mechanisms	39
Make a Positive Feedback Loop for Methane	41
Part 3: Climate Change	43
First a Word about the Weather	43
The Weather	43
The Climate: What Has the Weather Been at My House for the Past 30 Years?	45
The Evidence for Climate Change	48
Melting Sea Ice Coloring Activity	51
The Effect of the Rising Temperature on a Major Carbon Sink: Sinking Time into the Scientific Method	52
What Does It Matter if the Temperature Rises a Little?	55
Adaptation Activity: It's All about the Rate	57
Part 4: What Can Be Done to Help?	59
Alternative Sources of Energy	59
Comparing the Carbon "Tire"-Prints of Cars Activity	60
Your Carbon Footprint and How You Can Reduce It	61
Food Has a Carbon Footprint: Field Trip to the Grocery Store	62
Why Recycle?	65
How I Am Going to Shrink My Carbon Footprint	67
Bibliography	69
Glossary	70
List of Supplies	72
Appendix 1: How Many Molecules Are in a Box of Air Template	73
Appendix 2: Graph the Concentrations of Greenhouse Gases	75
Appendix 3: Field Trip to the Grocery Store Worksheet	77
Appendix 4: Answer Key	79
